TECHNICAL OFFICE (JUNIOR)ENGINEER

KROSAKI HARIMA EUROPE B.V

KROSAKI HARIMA EUROPE B.V

From our main office in North Holland and regional offices throughout Europe we provide technical, logistical and sales support for the refractories manufactured by Krosaki throughout the world. Group headquarters being in Japan. Our growth is achieved by concentrating on service and relationships with major European Steel Manufacturers.

Krosaki group manufactures and sells refractories since its establishment in 1919 using state-of-the-art technology, demonstrating respect to the law and sensitivity to global environmental challenges.

We are looking for a new colleague in our Technical department.

HOW YOU CAN MAKE A DIFFERENCE

As a Technical Office (Junior) Engineer, you will contribute to the success of steel plants by providing technical support in the selection, design, and application of refractory materials. Your work will ensure the optimization of industrial processes and equipment through the integration of Industry 4.0 technologies, such as automation, real-time monitoring, and data-driven solutions.

WHO YOU ARE

We are looking for a colleague who:

- Bachelor's degree in Materials, Mechanical, Ceramic Engineering, or a related field.
- Knowledge of refractory materials and their applications, and steel plant operations is a plus
- Proficient in CAD software (e.g., AutoCAD, SolidWorks) for technical drawings.
- Analytical skills to assist in engineering calculations and solve technical issues.
- Strong written and spoken English communication skills.

- Organizational abilities to handle multiple projects and meet deadlines.
- Collaborative team player who works well across departments.
- Eager to learn and stay updated on Industry 4.0 technologies.
- Residing in the Netherlands or within the European Union with a valid work permit to work in the Netherlands.

WHAT YOU'LL DO

As a Technical office (junior) engineer you will:

- Assist in the preparation of technical documents, such as drawings, specifications, and material selection reports.
- Collaborate with senior engineers and project managers in preparing project proposals, cost estimations, and timelines.
- Perform basic engineering calculations and prepare CAD drawings for refractory designs.
- Provide technical assistance to clients, answering inquiries related to product specifications and troubleshooting issues.
- Support site visits, performance analysis, and documentation of project outcomes.
- Stay updated on advancements in automation, robotics, and other relevant technologies for steel plants.

IS THIS YOU?

We are looking for a colleague who:

- You have a technical background in engineering and are familiar with CAD tools.
- You enjoy solving technical problems and have a good understanding of materials.
- You can communicate effectively in English, both written and spoken, with clients and internal teams.
- You are organized and able to manage multiple tasks efficiently.
- You reside in the Netherlands or the EU and have a valid work permit.
- You are open to continuous learning and eager to work with cutting-edge technologies in the refractory and steel industries.

Training is important to us as a business and will be provided.

WHY CHOOSE KROSAKI?

We offer a stimulating environment in an international team, where we encourage personal and professional growth. You will have the possibility to make an impact in a fast-growing company, whilst at the same time develop your technical and commercial skills. Additionally, we offer a competitive package.

If you think you are a good fit for this job, please send us your CV and motivation letter to hr@krosaki.nl.

We look forward to speaking to you!
